Hands-on Exercise No. 2 DigiSkills 3.0 Batch-03 Startup Strategies and Entrepreneurship		Total Marks: 10 Due Date: 14/05/2026	

Instructions:

Please read the following instructions carefully before submitting this Hands-on Exercise:

- Use MS Word to prepare exercise solutions.
- Your submitted exercise will not be considered/counted if:
 - It is submitted after due date.
 - It is not in the required format (.doc or .docx)
 - It does not open, or file is corrupt.
 - It is copied (partial or full) from any source (websites, forums, students, etc.)

Learning Outcome:

After completing this exercise, you shall be able to:

- Identify fatal "red flags" in a business model.
- Design viable shifts to save failing ventures.
- Master the balance of burn rate and market fit.

Problem Statement

Many startups fail within their first five years because they ignore critical market signals or mismanage their resources. This assignment requires you to act as a business consultant to "biopsy" a failed venture and identify where the logic of their business model collapsed. By analyzing these past mistakes, you will develop the strategic foresight needed to steer a startup toward long-term survival.

Task 1: The Failure Identification (3 Marks)

Which specific startup that closed in the last five years have you selected, and which single component of their Business Model Canvas (e.g., Value Proposition, Revenue Stream, or Customer Segment) was the primary cause of their shutdown?

Task 2: The Root Cause Analysis (3 Marks)

Why did this specific component fail, was it due to an unsustainable "**Burn Rate**" (spending too much cash), a lack of "**Product-Market Fit**" (nobody wanted the product), or intense competition that they failed to anticipate?

Task 3: The Survival Pivot (4 Marks)

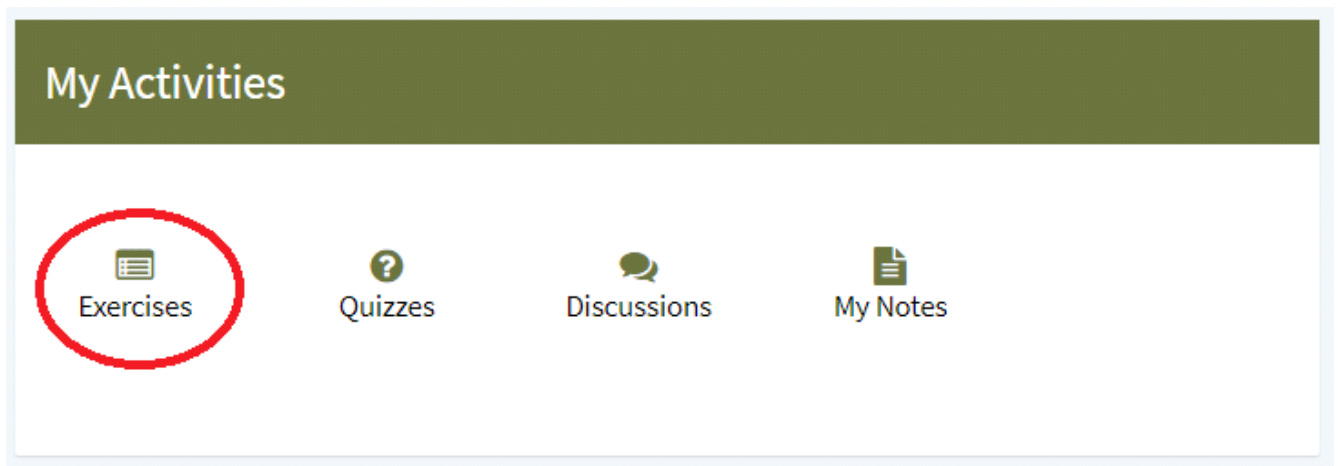

If you were the CEO six months before the shutdown, what specific "**Pivot**" strategy would you have implemented to save the company, and how exactly would this change have fixed the failure identified in Task 1?

BEST OF LUCK ☺

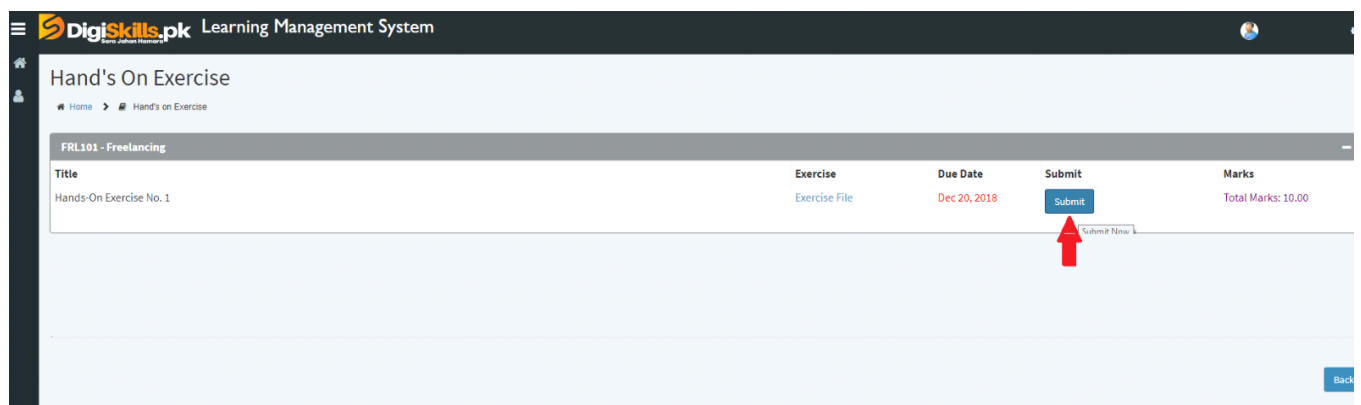

How to submit solution file on LMS?

Please perform the following steps for submitting your solution using LMS:

- Login to the LMS.
- Click on the **Exercises** button within the **My Activities** section.

- Click on the submit button to upload your Solution.

- Keep in mind to upload your Solution in .doc or .docx format.
